

## Context Diagram

## System flow per user type:

**Applicant** – after mag sign-up, nakadefault ito as Applicant.

1. View Careers Page
2. Click **View Details**, then mag po-pup yung modal dapat, pero hindi ko pa nagagawa, sample lang 'to ng output kasi sa **Admin Side** i-aadd yung Jobs like yung Admin ay mag a-add ng Job tapos malalagay sa **Client** as well as **Admin Side**.

3. After clicking **View Details**, nag pop na yung modal tapos meron doon sa modal nun dapat na 2 columns, for **Job Overview** and **Form** where the applicant can input their information and their **curriculum vitae**.

4. After nun mag wa-wait na lang yung **applicant** sa response ng **admin**.
5. Then, balak ko sana may messaging na rin para sa system na mismo yung **applicant** and **admin** mag uusap.
6. Then sa objectives naming, nag lagay kami ng chatbot tapos **OpenAI** yung API.

Actually, kulang pa yung **input field** sa **registration**, balak ko ilagay yung birthday and sex, para may pang dagdag sa charts sa **admin side**.

**Administrator** – Human Resource Personnel of our client.

1. They are the one who will do the Job Postings.
2. Performs the Resume Parsing.

**Liam Flores** 👤 Liam Flores

Student Intern, Financial Accounting Development Program, Mutual of Omaha  
Bellevue, United States

Current Benefits	<a href="#">+ Add</a>
Notice Period	<a href="#">+ Add</a>
Expected Salary	<a href="#">+ Add</a>
Expected Benefits	<a href="#">+ Add</a>
Nationalities	American
Languages	<a href="#">+ Add</a>
Candidate Reference Name	<a href="#">+ Add</a>
GDPR Consent	Pending
Candidate Description	<a href="#">+ Add</a>
Email Consent	Pending

**Employee Details**

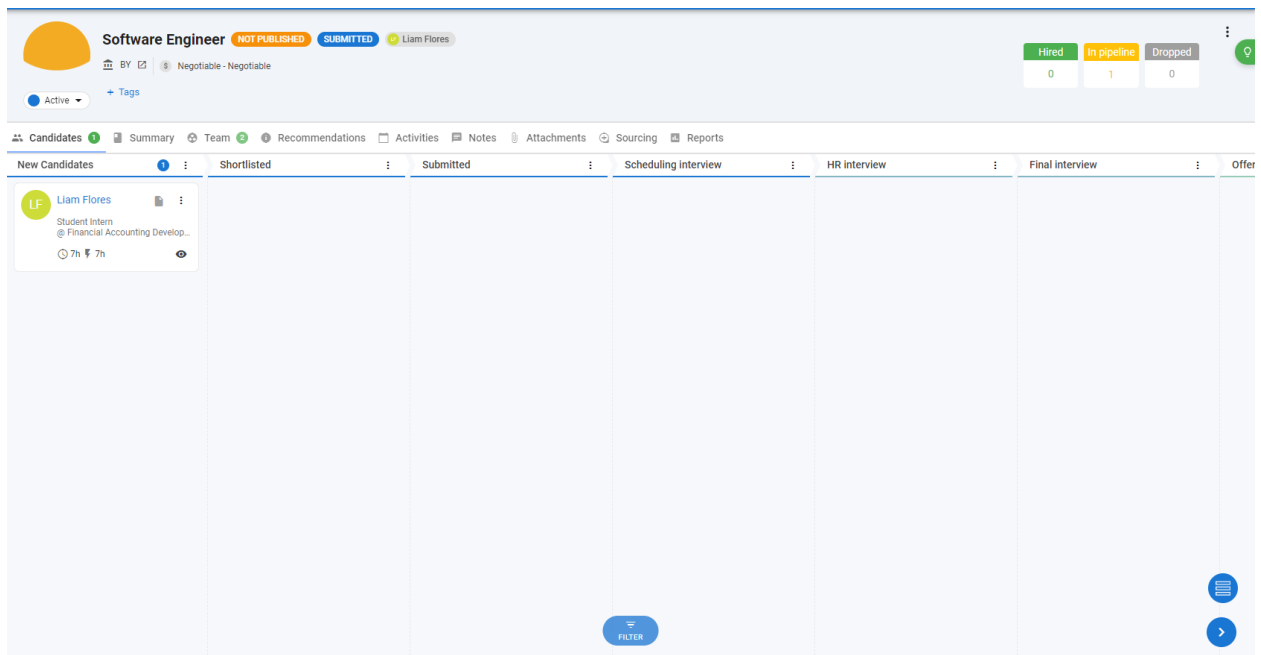

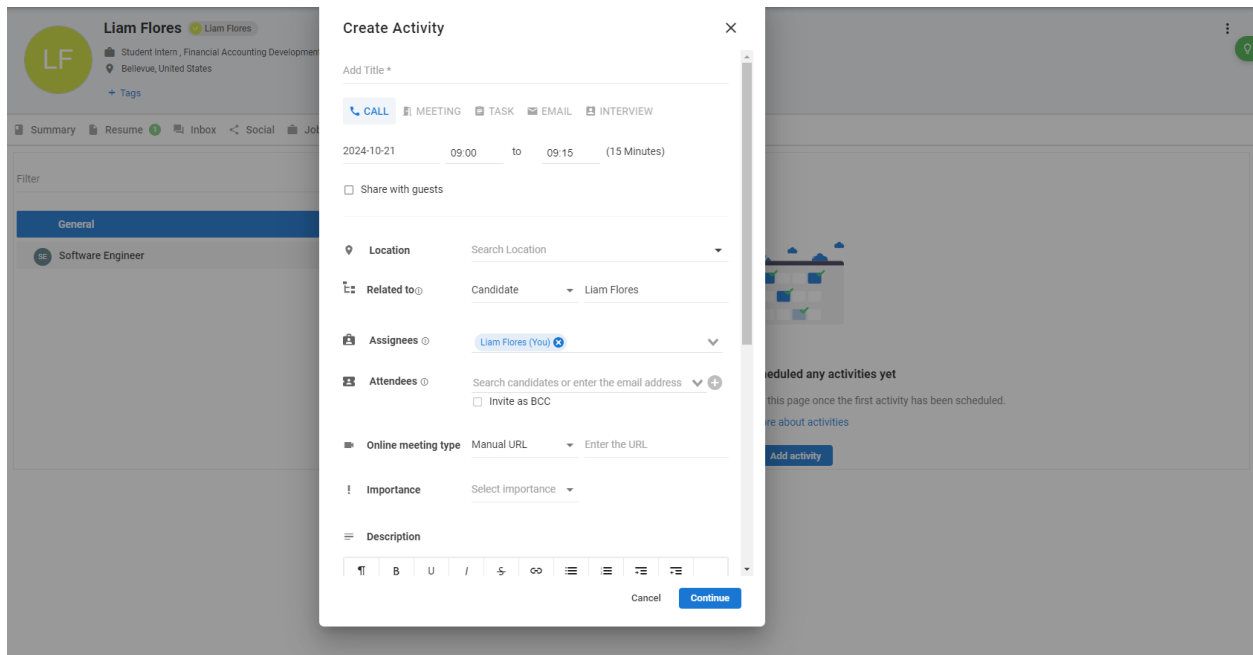

Ganito sana result after parsing. Tapos ganito if doable or kaya. Sa Tab ng Summary, Resume etc. Idk ano tawag dito pero parang tabbed card siya sa tabler pero mukha rin siyang navigation bar haha.

3. Tapos diba i-implement nga yung OpenAI, ang suggestion nila Sir Alfie nung nag defense kami ay parang mag lalagay ng **FAQs**, tapos if possible rin na for example per job na vacant is may questions template is dito na lang naming ilalagay then if yung response nila is pwede makita ng **admin**.
4. After ni **admin** i-parse yung resume, babaguhin niya yung status ng recruitment sa side niya and mag rereflect din sa Recruitment Status ng client side. Ganito yung ginawa naming kasi yung iba'y pag rejected yung application is wala na talaga like walang notification.

Position Name	Match Stage	Dropped	Drop Reasons	Match Owner	Match Created D...
Software Engineer	PROBATION PASSED	No		LF Liam ...	2024-10-19

Tapos sag anito yung digital na interview after ng mga assessment.

Ganito yung sa status, para siyang **Asana** na iddrag depende sa status nung applicant's recruitment.

Bale yung mga items sa navbar nito are:
